Diagnostics & Training

# ULTIMATE COMMON RAIL DIESEL

## DIAGNOSTICS COURSE

### BRISBANE

HELD OVER 2 DAYS

**FRIDAY 26TH 6PM - 9PM & SATURDAY 27TH NOVEMBER 8AM - 4PM**

Proudly hosted by Motor Trades Association Of Queensland - MTAQ

**M T A**  
QUEENSLAND

**Explanation of common rail diesel engine operation**

Types of common rail diesel fuel systems

**Identify system components and location**

Component operation and case studies of known failures

**Scan tool injector feedback explanation for diagnosing compression and injector failure**

Explanation of testing Bosch pressure regulators

**Diagnostic and repair solutions for intake, turbo, EGR & emission systems**

On vehicle diagnostic techniques without a scan tool

**Participate and learn to test pumps, rails & injectors without removing from the engine**

Vital injector back-leakage testing and what the results mean

**Testing low pressure supply systems**

Clinton Brett a Diesel Fuel Injection Specialist with 30 plus years experience will enhance your diagnostics ability by providing you with an understanding of what you're diagnosing and why.

## TESTIMONIALS

Clinton teaches us to use our own body senses. To observe, smell and touch the engine's outputs in terms of smoke, heat and sound. This concept, along with measuring technologies of modern tooling, gives a much higher level of competence when diagnosing engine faults, a faster and more accurate diagnosis.

Gunnedah Diesel Service

It is always good to attend a training course where the trainer has real world experience with the subject.

It is always easy to tell when someone is just reciting a text book, and it makes the experience less genuine. Clinton definitely has been there, and done that.

Autoco Phillip

THANK YOU very much to Clinton for such a knowledgeable and detailed explanation of the common rail system and diagnostic procedures.

I can not thank Clinton enough for making the CRD system transparent and comprehensible.

O'Tooles Automotive

\$640 per person course is limited to 15 participants, includes training booklet, certificate, refreshments & light meals.
