

GROUP TRAINING PACKAGES: COMMON RAIL DIESEL DIAGNOSTICS TRAINING

Clinton Brett

Diesel Help Australia

The diesel vehicle surges or blows smoke but has no fault code!
What if your scan tool cannot extract a fault code or your scan tool will not communicate with your ECU?

Learn how to diagnose common rail diesel (CRD) without relying solely on a scan tool.

Diesel Help Australia can provide the following training courses which can be tailored for light, heavy, earthmoving, agricultural, marine and industrial engines.

The Ultimate CRD Diagnostic Course

- Course delivered by Clinton Brett heavy vehicle mechanic and diesel fuel injection specialist
- Clinton has over 30yrs experience in the trade, his techniques are focused around systematic elimination of different parts of the fuel system without the need to rely only on what the computer fault code displays.
- 8 hours of CRD theory & practical on-vehicle fault finding and diagnostics
- Hardcopy training booklet
- Digital certificate of participation

GROUP TRAINING PACKAGES

Over the past 2 years we've experienced a decline of interest in the country towns which has meant cancelling some of these events. For our business, training remote towns means an extra 2 days of travel and accommodation. That's not our concern. To cancel a weekend is costly to both our business and others. We receive requests all year round for training. It's not as easy as returning a part you no longer require. We don't get credit refunds on weekends, that's it, they're gone.

Last year all of our major city courses have seen great numbers, most have been a sell out. Many country workshops have been making the long trips to the city and we really appreciate your efforts, no doubt that's quite an expense to your business. Since the beginning our objective has been take the training everywhere, especially regional Australia.

The most viable way to continue delivering training to regional / rural Australia and New Zealand is to offer a group package. These packages enable you to resell to your clients and fill up seats with your staff present. Our popular long standing course; Ultimate CRD Diagnostics Course is run over 8 hours for up to 15 people per session.

Tickets for the Ultimate CRD Diagnostic Course are generally sold for \$640 this includes training booklet, certificate of participation, meals and refreshments.

Here are some options you might want to consider:

- \$510 including catering per person can be resold for up to \$640
- If you want to cater for the event, ask us how we keep our catering costs down!

We have additional courses we can also deliver to compliment your training event:

DPF Diagnosing & Testing

EGR Diagnosing & Testing

Diagnosing ZD30 Nissan Patrol & Navara

Common Diesel Faults and Scan Tools Course

Diesel Service Advisor
